## Schnitzler Rettungsprodukte GmbH Co. KG

Our specially developed for **safe and comfortable transportation** products are established for professional use in emergency medical services.

From major disasters, extreme deployments to patient relocation, we are a renowned rescue service, with years of experience.

Just like our customers, Schnitzler also pride ourselves in providing the **highest standards of safety, handling and comfort**, by working closely with emergency services and specialists.

So we can align our predominantly patented and TÜV-certified products optimally to the needs of the practice.

At Schnitzler, we constantly adapt to the prevailing safety regulations and DIN or EN standards by focusing on the development of our recovery products. Our products meet the directive of DIN EN 1789 Safety Restraint System and DIN EN 1865 for Vacuum Mattress.

The certification of Child Restraint System by TÜV to meet the DIN EN 1789 is currently unique in Australia!
