

New Light Weight Long Spine Board

Designed around the demands of ambulance, fire and other rescue services looking for a superior light weight spinal board, RAPP Australia has redesigned our long spineboard and improved it to create a significantly lighter weight board with an excellent strength to weight ratio whilst maintaining a thin profile.

This non-conductive, super light NEANN Long Spineboard (LSB) delivers superior comfort for paramedics with newly designed hand holds, curvature angles and increased strength, making manual handling easier while still maintaining the functionality of the spineboard.

- ✓ **Greater flexibility**
More strapping points for greater flexibility in securing the patient to the super light NEANN spineboard, this new design delivers superior comfort and ease of use for paramedics.
- ✓ **Safety tested**
With increased strength, a tested rating (with a 100% safety margin) a load of 350kg, with virtually no deflection when lifted in accordance with instructions.
- ✓ **Already trained**
By maintaining the original NEANN spineboard's application procedures, no re-education is required by services as it remains consistent with practices currently in place. In addition an OH&S label/guide is included on every LSB to assist in lifting heavy patients safely.
- ✓ **Optional extras**
The NEANN Long Board Mattress (LBM) is a padded device designed for use for the Super Light Long Spineboard providing significantly improved comfort for the patient.

Even if you order only one NEANN LSB your organisations' logo can be included to the front of the long spineboard. Please ask for a quotation.

LIGHT WEIGHT • GREATER FLEXABILITY • NO TRAINING REQUIRED
CAN HOLD UP TO 350KG • SUPERIOR COMFORT • OH&S GUIDE

WWW.NEANN.COM.AU

is a division of RAPP Australia Pty Ltd
