ONLY ONE

MASKED LARYNGEAL AIRWAY PREVENTS OVERINFLATION

air-Q® sp

The Only Self-Pressurizing Mask Cuff

Takes the Guesswork out of Mask Cuff Inflation

- No inflation line necessary
- Eliminates the extra step of inflating the mask cuff
- Eliminates mask cuff overinflation

SAFE. SIMPLE. SELF-PRESSURIZING.

Introducing the air-Q®sp, the New Self-Pressurizing, Disposable, Masked Laryngeal Airways

Removable color-coded connector facilitates intubation

- The New air-Qsp eliminates the extra step and guesswork for mask cuff inflation and the potential for over-inflation.
  - The new design allows Positive Pressure Ventilation to self-pressurize the mask cuff. The increase in cuff seal pressure occurs at the exact time you need it, during the upstroke of ventilation.
- On exhalation, the cuff decompresses to the level of the PEEP.
  - The intra-cuff pressure cycles between the Peak Airway Pressure usually 15 - 30 cm H_2O and the level of PEEP < 10 cm H_2O. Seal Pressure on exhalation averages 17 - 20 cm H_2O.
- The result is a safer, efficient, low-pressure seal during the majority of the case. The cyclical lowering in intra-cuff pressure may assist in diminishing complications such as:
  - Mucosal and nerve trauma that result from over-inflating traditional peripheral laryngeal mask cuffs.
- Allows intubation like the regular air-Q®.
- The SP version can be used as an "everyday" airway that facilitates intubation.

Self-pressurizing mask cuff

air-Q®sp

The Only Self-Pressurizing Mask Cuff

air-Q®sp

6 sizes available

1.0 disposable air-Qsp | 1.5 disposable air-Qsp | 2.0 disposable air-Qsp | 2.5 disposable air-Qsp | 3.5 disposable air-Qsp | 4.5 disposable air-Qsp

With the new patented SELF-PRESSURIZING, disposable air-Qsp, there is no need to inflate the mask; it self-pressurizes to the proper inflation pressure automatically.

ORDERING INFORMATION

Item	Size	Description	Quantity	Patient Weight
#10-4010	1.0	air-Qsp (Self-Pressurizing) Disposable Masked Laryngeal Airway, light blue connector	10/Box	<7 kgs
#10-4015	1.5	air-Qsp (Self-Pressurizing) Disposable Masked Laryngeal Airway, light green connector	10/Box	7 - 17 kgs
#10-4020	2.0	air-Qsp (Self-Pressurizing) Disposable Masked Laryngeal Airway, orange connector	10/Box	17 - 30 kgs
#10-4025	2.5	air-Qsp (Self-Pressurizing) Disposable Masked Laryngeal Airway, yellow connector	10/Box	30 - 50 kgs
#10-4035	3.5	air-Qsp (Self-Pressurizing) Disposable Masked Laryngeal Airway, red connector	10/Box	50 - 70 kgs
#10-4045	4.5	air-Qsp (Self-Pressurizing) Disposable Masked Laryngeal Airway, purple connector	10/Box	70 - 100 kgs
#10-1006	#00	Disposable Removal Stylet for 1.0 & 1.5 airway	10/Box	
#10-1005	#0	Disposable Removal Stylet for 2.0 & 2.5 airway	10/Box	
#10-1004	#1	Disposable Removal Stylet for 3.5 & 4.5 airway	10/Box
